

INSTRUCTION MANUAL Ver 2.0

Mini Speed Dome Camera (x12)

CAUTION
RISK OF ELECTRIC
SHOCK DO NOT OPEN

CAUTION : TO REDUCE THE RISK OF ELECTRICAL SHOCK, DO NOT OPEN COVERS.
NO USER SERVICEABLE PARTS INSIDE.
REFER SERVICING TO QUALIFIED SERVICE PERSONAL.

This lightning flash with arrowhead symbol is intended to alert the user to the presence of un-insulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

This exclamation point symbol is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

FC Tested To Comply
with FCC Standards
FOR HOME OR OFFICE USE

This Device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interface, and
- (2) This devides must accept any interference received, including interference that may cause undesired operations.

Important Safeguard

1. Read Instructions

Read all of the safety and operating instructions before using the product.

2. Retain Instructions

Save these instructions for future reference.

3. Attachments / Accessories

Do not use attachments or accessories unless recommended by the appliance manufacturer as they may cause hazards, damage product and void warranty.

4. Installation

Do not place or mount this product in or on an unstable or improperly supported location. Improperly installed product may fall, causing serious injury to a child or adult, and damage to the product. Use only with a mounting device recommended by the manufacturer, or sold with the product. To insure proper mounting, follow the manufacturer's instructions and use only mounting accessories recommended by manufacturer.

5. Power source

This product should be operated only from the type of power source indicated on the marking label.

Precautions

☐ Operating

- Before using, make sure power supply and others are properly connected.
- While operating, if any abnormal condition or malfunction is observed, stop using the camera immediately and then contact your local dealer.

☐ Handling

- Do not disassemble or tamper with parts inside the camera.
- Do not drop or subject the camera to shock and vibration as this can damage camera.
- Care must be taken when you clean the clear dome cover. Especially, scratch and dust will ruin your quality of camera.

☐ Installation and Storage

- Do not install the camera in areas of extreme temperature, which exceed the allowable range.
- Avoid installing in humid or dusty places.
- Avoid installing in places where radiation is present.
- Avoid installing in places where there are strong magnetic fields and electric signals.
- Avoid installing in places where the camera would be subject to strong vibrations.

Features

❑ Camera Specifications

- CCD Sensor : Sony 1/4" Super-HAD CCD (12T model)
Sony 1/4" ExView-HAD PS CCD (12W model)
- Zoom Magnification : $\times 12$ Optical Zoom, $\times 12$ Digital Zoom (Max $\times 144$ Zoom)
- Day & Night Function
- Various Focus Mode : Auto-Focus / Manual Focus / Semi-Auto Focus.
- Independent & Simultaneous Camera Characteristic Setup in Preset operation

❑ Powerful Pan/Tilt Functions

- Max. 360°/sec high speed Pan/Tilt Motion
- Using Vector Drive Technology, Pan/Tilt motions are accomplished in a shortest path. As a result, time to target view is reduced dramatically and the video on the monitor is very natural to watch.
- For jog operation using a controller, since ultra slow speed 0.05°/sec can be reached, it is very easy to locate camera to desired target view. Additionally it is easy to move camera to a desired position with zoom-proportional pan/tilt movement.

❑ Preset, Pattern, Swing, Group, Privacy Mask and More...

- MAX. 127 Presets are assignable and characteristics of each preset can be set up independently, such as White Balance, Auto Exposure, Label and so on.
- Max. 8 set of Swing action can be stored. This enables to move camera repetitively between two preset positions with designated speed.
- Max. 4 of Patterns can be recorded and played back. This enables to move camera to follow any trajectory operated by joystick as closely as possible.
- Max. 8 set of Group action can be stored. This enables to move camera repetitively with combination of Preset or Pattern or Swing. A Group is composed of max. 20 entities of Preset/Pattern/Swings.
- Privacy Masks are assignable, not to intrude on other's privacy. (8 Privacy Zones)

❑ PTZ(Pan/Tilt/Zoom) Control

- With RS-485 communication, max. 255 of cameras can be controlled at the same time.
- Pelco-D or Pelco-P protocol can be selected as a control protocol in the current version of firmware.

❑ **OSD(On Screen Display) Menu**

- OSD menu is provided to display the status of camera and to configure the functions interactively.
- The information such as Camera ID, Pan/Tilt Angle, Alarm Input and Preset can be displayed on screen.

❑ **Alarm I/O Functions**

- 4 alarm sensor Inputs are available.
- To reject external electric noise and shock perfectly, alarm sensor Input is decoupled with photo coupler.
- The signal range of sensor input is from DC 5.0 to 12.0 volts to adopt various applications.
- A camera can be set to move to a Preset position or to run functions such as Pattern, Swing and Group when there are external sensor activations. Also “Post Alarm” function can be set, which is supposed to activate after pre-defined time period and sequentially in succession to the action by external sensor activation.

❑ **Reserved Presets for Special Purpose**

- Most camera characteristics can be set up easily and directly with reserved preset, not entering into OSD menu. For more information, refer to “Reserved Preset” in this manual.

❑ **Easy Installation and Perfect Outdoor Environment Compatibility**

- Fans and heaters are built-in in camera for cold and hot temperature environment. Also idealistic mechanical design protects camera from water and dust. (IP66 when installed properly with wall mount bracket only)
- It is easy to install and repair camera.

Product & Accessories

Product & Accessories

● Main Body

● Accessory

(Terminal Block, BNC Cable, Wrench, Screws)

Options

● Surface Mount Bracket

● Wall Mount Bracket

● Ceiling Mount Bracket

Parts Name & Functions

- **Dome Cover** Do not detach protection vinyl from dome cover before finishing all installation process to protect dome cover from scratches or dust.
- **Mount Bracket** Used to install camera on surface of ceiling or wall. There are 3 types of installation.(Surface Mount Type, Wall Mount Type and Ceiling Mount Type) When installing, install brackets first and then install Main Body.
- **Lockup Screw** Fixes main unit to surface mount bracket.
- **Cabling Terminal Block** During installation, Power, Video, Communication, Alarm Input cables are connected on to this cabling terminal block.
- **DIP Switch** Adjusts camera ID and protocols.
- **Drop Prevention Spring** Keeps the camera from dropping during installation and repair. After installing a bracket, hang the spring to the drop prevention hook of Main Body as shown in the following picture for further tasks.
- **Assemble Reference Line** Mark to assemble Main Body to bracket.

DIP Switch Setup

Before you install the camera, you should set the DIP switches to configure the camera ID, communication protocol.

Camera ID Setup

- ID number of camera is set using binary number. The example is shown below.

Pin	1	2	3	4	5	6	7	8
ID Value	1	2	4	8	16	32	64	128
ex) ID=5	on	off	on	off	off	off	off	off
ex) ID=10	off	on	off	on	off	off	off	off

- The range of ID is 1~255. **Do not use 0 as camera ID.** Factory default of Camera ID is 1.
- If you want to control a certain camera, you must match the camera ID with Cam ID setting of DVR or Controller.

❑ Communication Protocol Setup

- Select the appropriate Protocol with DIP switch combination.

Switch State		Protocol
P0 (Pin 1)	P1 (Pin 2)	
OFF	OFF	PELCO-D, 2400 bps
ON	OFF	PELCO-D, 9600 bps
OFF	ON	PELCO-P, 4800 bps
ON	ON	PELCO-P, 9600 bps

- If you want to control using DVR or P/T controller, their protocol must be identical to camera. Otherwise, you can not control the camera.
- If you changed camera protocol by changing DIP S/W, the change will be effective after you reboot the camera.
- Factory default of protocol is "Pelco-D, 2400 bps".

❑ NTSC/PAL (Reserved for Supplier)

- Since Pin 3 is only for supplier, DO NOT CHANGE THESE ITS ORIGINAL STATE. If you change one of these, proper operation can not be achieved.

⊙ Pin 3 PAL / NTSC system selection of Camera. DO NOT CHANGE THIS PIN.

□ Terminal resistor Setup

Terminal resistor is used if your system is one of following two cases.

- **Case1: Control cable between camera and controller is relatively very long (1:1 connection)**

If communication cable is very long, the electrical signal will bound in the terminal point. This reflected signal cause distortion of original signal. Accordingly, the camera can be out of control. In this case, the terminal resistor of both sides i.e. camera and controller must be set to 'ON' state.

- **Case2: Multiple cameras are controlled at the same time**

Due to similar reasons with case 1, the terminal resistors of controller and the last camera must be set to 'ON' state. Last camera means decided by cable length. Do not turn on the terminal resistor of all cameras.

Installation using Surface Mount Bracket

- ① To pass cables through to upside of ceiling, make a hole whose diameter is about 50~60mm on the ceiling panel.
- ② After assembling Rubber Gasket to Mount Cover, install Mount Cover on surface of ceiling panel.

- ③ Hook up "Drop Prevention Spring" on main body to prevent camera from unexpected drop and connect cables to Main Body with terminal blocks.
- ④ Check the 2 mold line for assembly before starting assembly. Line up the mold lines as shown in the circle shown below and assemble Main Body to Mount Cover. Then screw up the 4 screws with wrench included in the product box and detach the vinyl on dome cover

Important Notice

- Before starting installation, make sure that Camera ID and Protocol are set up properly.
- When the pipe hole on side of Mount Bracket is not used, make sure that the hole is closed properly.

Installation using Ceiling Mount Bracket

① To pass cables through to upside of ceiling, make a hole whose diameter is about 50~60mm on the ceiling panel. Then attach the Ceiling Mount Bracket on.

② Turn camera housing on its axis in CW(Clockwise) direction until it stops.

③ Hook up "Drop Prevention Spring" on main body to prevent camera from unexpected drop and connect cables to Main Body with terminal blocks.

④ Check the 2 mold line for assembly before starting assembly. Line up the mold lines as shown in the circle shown below and assemble Main Body to Ceiling Mount Bracket. Then screw up the 4 screws with wrench included in the product box and detach the vinyl on dome cover.

Important Notice

- Before starting installation, make sure that Camera ID and Protocol are set up properly.
- To adjust the location of camera, pipe and coupler should be needed. Note that they should not be included in the product box and not supplied by manufacturer

Installation using Wall Mount Bracket

- ① To pass cables through to inside of wall, make a hole whose diameter is about 50~60mm on the wall. Then attach the Wall Mount Bracket with gasket on it.
- ② Hook up “Drop Prevention Spring” on main body to prevent camera from unexpected drop and connect cables to Main Body with terminal blocks.

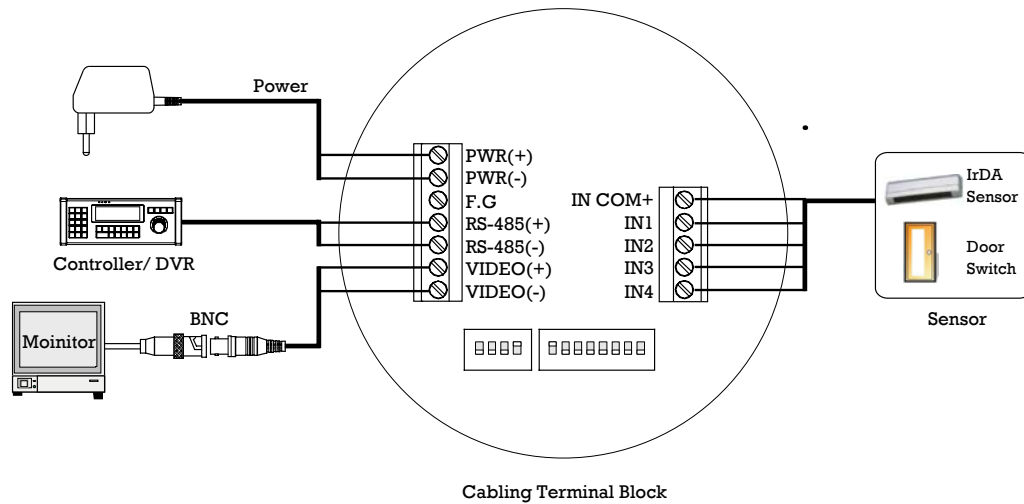

- ③ Check the 2 mold line for assembly before starting assembly. Line up the mold lines as shown in the circle shown below and assemble Main Body to Wall Mount Bracket.
- ④ Then screw up the 4 screws with wrench included in the product box and detach the vinyl on dome cover.

Important Notice

- Before starting installation, make sure that Camera ID and Protocol are set up properly.
- When the pipe hole on side of Mount Bracket is not used, make sure that the hole is closed properly

Cabling

Power Connection

- Please, check the voltage and current capacity of rated power carefully. Rated power is indicated in the back of main unit.

Rated Power	Input Voltage Range	Current Consumption
DC 12V	DC 11V ~ 18V	2.5 A (Fan/Heater Model)
AC 24V	AC 17V ~ 29V	1.5 A (Fan/Heater Model)

RS-485 Communication

- For PTZ control, connect this line to keyboard and DVR. To control multiple cameras at the same time, RS-485 communication lines of them is connected in parallel as shown below.

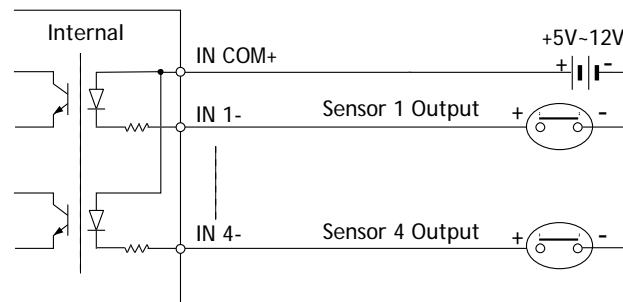

❑ Video Connection

- Connect with BNC coaxial cable.

❑ Alarm Input Connection

- Sensor Input

Before connecting sensors, check driving voltage and output signal type of the sensor. Since output signal types of the sensors are divided into Open Collector and Voltage Output type in general, the cabling must be done properly after considering these typed.

Signal	Description
IN COM+	Connect (+) cable of electric power source for Sensors to this port as shown in the circuit above.
IN1-, IN2-, IN3-, IN4-	Connect output of sensors for each port as shown in the circuit above.

If you want to use Alarm Input, the types of sensor must be selected in OSD menu. The sensor types are Normal Open and Normal. If sensor type is not selected properly, the alarm can be activated reversely.

⊙ Normal Open	Output Voltage is high state when sensor is activated
⊙ Normal Close	Output Voltage is high state when sensor is not activated

Check points before operation

- Before power is applied, please check the cables carefully.
- The camera ID of the controller must be identical to that of the target camera. The camera ID can be checked by reading DIP switch of the camera.
- If your controller supports multi-protocols, the protocol must be changed to match to that of the camera.
- If you changed camera protocol by changing DIP switch, the change will be effective after you reboot the camera.
- Since the operation method can be different for each controller available, refer to the manual for your controller if camera can not be controlled properly. The operation of this manual is based on the standard Pelco® Controller.

Preset and Pattern Function Pre-Check

- Check how to operate preset and pattern function with controller or DVR in advance to operate camera function fully when using controller or DVR.
- Refer to the following table when using standard Pelco® protocol controller.

< Go Preset >	Input [Preset Number] and press [Preset] button shortly.
< Set Preset >	Input [Preset Number] and press [Preset] button for more than 2 seconds.
< Run Pattern >	Input [Pattern Number] and press [Pattern] button shortly.
< Set Pattern >	Input [Pattern Number] and press [Pattern] button for more than 2 seconds.

- If controller or DVR has no pattern button or function, use shortcut keys with preset numbers. For more information, refer to "Reserved Preset" in this manual.

Starting OSD Menu

- **Function** Using the OSD menu, Preset, Pattern, Swing, Group and Alarm Input function can be configured for each application.
- **Enter Menu** <Go Preset> [95]

Reserved Preset

- **Description** Some Preset numbers are reserved to special functions.
- **Function**
 - <Go Preset> [95] : Enters into OSD menu
 - <Go Preset> [131~134] : Runs Pattern Function 1 ~ 4
 - <Go Preset> [141~148] : Runs Swing Function 1 ~ 8
 - <Go Preset> [151~158] : Runs Group Function 1 ~ 8
 - <Go Preset> [167] : Set Zoom Proportional Function to ON
 - <Set Preset> [167] : Set Zoom Proportional Function to OFF
 - <Go Preset> [170] : Sets Camera BLC Mode to OFF
 - <Go Preset> [171] : Sets Camera BLC Mode to ON
 - <Go Preset> [174] : Sets Camera Focus Mode to AUTO
 - <Go Preset> [175] : Sets Camera Focus Mode to Manual
 - <Go Preset> [176] : Sets Camera Focus Mode to SEMI-AUTO
 - <Go Preset> [177] : Sets Day & Night Mode to AUTO
 - <Go Preset> [178] : Sets Day & Night Mode to NIGHT
 - <Go Preset> [179] : Sets Day & Night Mode to DAY
 - <Go Preset> [190] : Sets OSD Display Mode to AUTO (Except Privacy Mask)
 - <Go Preset> [191] : Sets OSD Display Mode to OFF (Except Privacy Mask)
 - <Go Preset> [192] : Setting OSD Display Mode to ON (Except Privacy Mask)
 - <Go Preset> [193] : Sets all Privacy Mask Display to OFF
 - <Go Preset> [194] : Sets all Privacy Mask Display to ON

Preset

- **Function** Max. 127 positions can be stored as Preset position. The Preset number can be assigned from 1 to 128, but 95 is reserved for starting OSD menu.
Camera characteristics (i.e. White Balance, Auto Exposure) can be set up independently for each preset. Label should be blank and "Camera Adjust" should be set to "GLOBAL" as default. All characteristics can be set up in OSD menu.
- **Set Preset** <Set Preset> [1~128]
- **Run Preset** <Go Preset> [1~128]
- **Delete Preset** To delete Preset, use OSD menu.

Swing

- **Function** By using Swing function, you can make camera to move between 2 Preset positions repeatedly. When swing function runs, camera moves from the preset assigned as the 1st point to the preset assigned as the 2nd point in CW(Clockwise) direction. Then camera moves from the preset assigned as the 2nd point to the preset assigned as the 1st point in CCW(Counterclockwise) direction.

In case that the preset assigned as the 1st point is same as the preset assigned as the 2nd point, camera turns on its axis by 360° in CW(Clockwise) direction and then it turns on its axis by 360° in CCW(Counterclockwise) direction.

Speed can be set up from 1°/sec to 180°/sec.

- **Set Swing** To set Swing, use OSD menu.
- **Run Swing**

Method 1) <Run Pattern> [Swing NO.+10]	ex) Run Swing 3 : <Run Pattern> [13]
Method 2) <Go Preset> [Swing NO.+140]	ex) Run Swing 3 : <Go Preset> [143]
- **Delete Swing** To delete Swing, use OSD menu.

Pattern

- **Function** Pattern Function is that a camera memorizes the path (mostly curve path) by joystick of controller for assigned time and revives the path exactly as it memorized.
4 Patterns are available and Maximum 1200 communication commands can be stored in a pattern.

- **Set Pattern** Pattern can be created by one of following two methods.

Method 1) <Set Pattern> [Pattern NO.]

- Pattern editing screen is displayed as bellow.

- Movement by Joystick and preset movement can be memorized in a pattern.
- The rest memory size is displayed in progress bar.
- To save the recording, press **NEAR** key and to cancel, press **FAR** key.

Method 2) OSD Using OSD Menu: See the section "How to use OSD Menu".

- **Run Pattern** Method 1) <Run Pattern> [Pattern NO.] ex) Run Pattern 2 : <Run Pattern> [2]
Method 2) <Go Preset> [Pattern NO.+130] ex) Run Pattern 2: <Go Preset> [132]
- **Delete Pattern** Use OSD menu to delete a Pattern.

Group

- Function

The group function allows running sequence of Presets, Pattern and/or Swings. Max 8 group can be stored. Each group can have max 20 action entities which can be preset, pattern or swing. Preset speed can be set up and the repeat number of Pattern & Swing can be set up in Group setup. Dwell time between actions can be set up also.

- Set Group

Use OSD Menu to create a Group.

- Run Group

Method 1) <Run Pattern> [Group NO.+20] ex) Run Group 7 : <Run Pattern> [27]

Method 2) <Go Preset> [Group NO.++150] ex) Run Group 7 : <Go Preset> [157]

- Delete Group

Use OSD Menu to delete.

Other Functions

- **Power Up Action** This function enables to resume the last action executed before power down. Most of actions such as Preset, Pattern, Swing and Group are available for this function but Jog actions are not available to resume.
- **Auto Flip** In case that tilt angle arrives at the top of tilt orbit (90°), zoom module camera keep moving to opposite tilt direction (180°) to keep tracing targets. As soon as zoom module camera passes through the top of tilt direction(90°), images should be reversed automatically and  appears in screen. If this function is set to OFF, tilt movement range is 0 ~ 95°.
- **Parking Action** This function makes a camera automatically run a pre-defined action if there is no command from controller for a pre-defined time period. "Wait Time" means how long a camera should wait for from the previous-last (most recent) command before running the pre-defined action. It can be set to 1 second ~ 3 hours.
- **Alarm Input** 4 Alarm Inputs are used. When external sensors activate, a camera runs pre-defined actions such as Preset, Pattern, Swing and Group. It is noted that the latest alarm input is effective if multiple sensors are activated.
- **Privacy Zone Mask** To protect privacy, MAX. 8 Privacy Masks can be created on the arbitrary position to hide objects such as windows, shops or private house. With Spherical Coordinates system, powerful Privacy Zone Mask function is possible.
- **GLOBAL/LOCAL Image Setup** WB(White Balance) and AE(Auto Exposure) can be set up independently for each preset. There are 2 modes, "Global" mode & "Local" mode. The Global mode means that WB or AE can be set up totally and simultaneously for all presets in "ZOOM CAMERA SETUP" menu. The Local mode means that WB or AE can be set up independently or separately for each preset in each preset setup menu. Each Local WB/AE value should activate correspondingly when camera arrives at each preset location.

During jog operation, Global WB/AE value should be applied. All Local WB/AE value do not change although Global WB/AE value changes.
- **SemiAuto Focus** This mode exchanges focus mode automatically between Manual Focus mode and Auto Focus mode by operation. Manual Focus mode activates in preset operation and Auto Focus mode activates during jog operation. With Manual mode at presets, Focus data is memorized in each preset in advance and camera calls focus data in correspondence with presets as soon as camera arrives at a preset. It should shorten time to get focuses.

Focus mode changes to Auto Focus mode automatically when jog operation starts.

OSD Display of Main Screen

- **P/T/Z Information** Current Pan/Tilt angle in degree, zoom magnification and a compass direction.
- **Camera ID** Current Camera ID(Address).
- **Action Title** Followings are possible Action Titles and their meaning.

"SET PRESET" xxx	When Preset xxx is stored
"PRESET" xxx	When camera reach to Preset xxx
"PATTERN" x	When Pattern x is in action
"SWGx/PRESET" xxx	When Swing x is in action
"UNDEFINED"	When undefined function is called to run
- **Preset Label** The Label stored for specific Preset.
- **Alarm Input** This information shows current state of Alarm Input. If an Input point is **ON** state it will show a number corresponding to each point. If an Input point is **OFF** state, '-' will be displayed.

Ex) Point 2 & 3 of inputs are **ON**, OSD will show as below

I : -23-
- **Image Flip** Shows that images are currently reversed by Auto Flip Function.

General Rules of Key Operation for Menu

- The menu items surrounded with () always has its sub menu.
- For all menu level, to go into sub menu, press **NEAR** key.
- To go to up-one-level menu, press **FAR** key.
- To move from items to item in the menu, use joystick in the **Up/Down** or **Left/Right**.
- To change a value of an item, use **Up/Down** of the joystick in the controller.
- Press **NEAR** key to save values and Press **FAR** key to cancel values.

Main Menu

```
SPEED DOME CAMERA
-----
-><SYSTEM INFORMATION>
<DISPLAY SETUP>
<DOME CAMERA SETUP>

<SYSTEM INITIALIZE>

EXIT
```

- **System Information** Displays system information and configuration.
- **Display Setup** Enable/Disable of OSD display on Main Screen.
- **Dome Camera Setup** Configure various functions of this camera.
- **System Initialize** Initializes system configuration and sets all data to factory default configuration.

Display Setup

```

DISPLAY SETUP
-----
->CAMERA ID          ON
PTZ INFORMATION     AUTO
ACTION TITLE        AUTO
PRESET LABEL         AUTO
ALARM INPUT          AUTO
<SET NORTH DIRECTION>
<PRIVACY ZONE>

BACK
EXIT
  
```

This menu defines Enable/Disable of OSD display on Main Screen. If an item is set to be AUTO, the item is displayed only when the value of it is changed.

- Camera ID [ON/OFF]
- PTZ Information [ON/OFF/AUTO]
- Action Title [ON/OFF/AUTO]
- Preset Label [ON/OFF/AUTO]
- Alarm Input [ON/OFF/AUTO]

▣ Compass Direction Setup

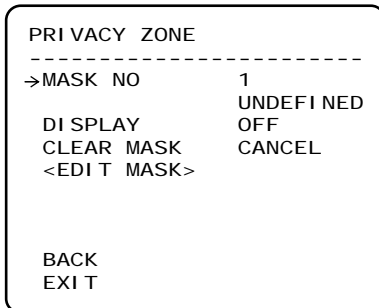

```

SET NORTH DIRECTION
-----

MOVE TO TARGET POSITION
[NEAR: SAVE /FAR: CANCEL]
  
```

Set North to assign compass direction as criteria. Move camera and press **NEAR** button to save.

PRIVACY ZONE MASK Setup

Select area in image to mask.

- Mask No [1~8]
Select Mask number. If the selected mask has already data, camera moves as it was set. Otherwise, "UNDEFINED" will be displayed under "Mask NO".
- Display [ON/OFF]
Sets if camera makes mask shows or not on images.
- Clear Mask [CANCEL/OK]
Deletes data in the selected mask NO.

□ Privacy Zone Area Setup

Move camera to area to mask. Then the menu to adjust mask size will be displayed.

□ Privacy Zone Size Adjustment

Adjust mask size. Use joystick or arrow buttons to adjust mask size.

- ◀ ▶ (Left/Right) Adjusts mask width.
- ▲ ▼ (Up/Down) Adjusts mask height.

CAMERA SETUP

```

ZOOM CAMERA SETUP
-----
-> FOCUS MODE      SEMI AUTO
   DIGITAL ZOOM    ON
   IMAGE FLIP      OFF
   SHARPNESS       2
   STABILIZATION   OFF
   <WHITE BALANCE  SETUP>
   <AUTO EXPOSURE  SETUP>

BACK
EXIT
  
```

Setup the general functions of zoom camera module.

● Focus Mode [AUTO/MANUAL/SEMI AUTO]

Sets camera focus mode.

○ SEMI AUTO Mode

This mode exchanges focus mode automatically between Manual Focus mode and Auto Focus mode. Manual Focus mode activates in preset operation and Auto Focus mode activates when jog operation starts.

With Manual mode at presets, Focus data is memorized in each preset in advance and camera calls focus data in correspondence with presets as soon as camera arrives at a preset.

● Digital Zoom [ON/OFF]

Sets digital zoom function to ON/OFF. If this is set to OFF, optical zoom function runs but zoom function stops at the end of optical zoom magnification.

● Image Flip [ON/OFF]

Sets System Image Flip Function to ON/OFF. When this function is set to ON, images come out flipped. When camera is installed in Desktop type, set to ON to get proper images.

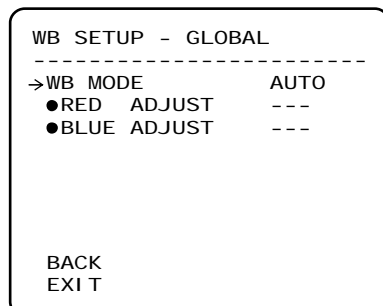

● Sharpness [0~3]

Sets image sharpness to enhance pictures.

● Stabilization [ON/OFF]

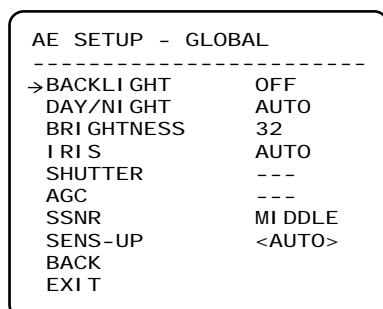

Compensates image vibrations by wind or others. The images with vibrations are compensated by Digital Zoom function and the image resolution with this function should be lower than normal image when this function is turned off.

❑ White Balance Setup

- WB Mode [AUTO/MANUAL]
In Manual mode, Red and Blue level can be set up manually
- Red Adjust [0~255]
- Blue Adjust [0~255]

❑ Auto Exposure Setup

- Backlight [ON/OFF] or [OFF/BLC/WDR]
Sets Backlight Compensation. 12W model has WDR(Wide Dynamic Range) function.
This function is disabled when Iris is Manual mode.
- Day/Night Sets up Day&Night mode.
- Brightness [0~64]
Adjusts brightness of images.
This function is disabled when Iris is Manual mode.
- IRIS [AUTO/MANUAL(0~64)]
Adjusts Iris value.
- Shutter Speed [A.Flicker/Manual(1/60(50)~1/10000 sec)]
Adjusts Shutter speed value.
This function is disabled when SensUp is Auto mode or WDR is ON.
If Shutter Speed is set to A.Flicker, to remove Flicker, Shutter Speed should be set to 1/50 sec. for NTSC and 1/60 for PAL.

- AGC [OFF/LOW/MIDDLE/HIGH/MANUAL(0~15)]
Enhances image brightness automatically in case that luminance level of image signal is too low.
This function is fixed High value when Day/Night is Auto mode.
- SSNR [OFF/LOW/MIDDLE/HIGH]
Enhances images by deducting noises when gain level of images is too high.
- SENS-UP [AUTO(2~256)/OFF]
Activates Slow Shutter function when luminance of image (signal) is too dark.
It is possible to set up the maximum number of frames piled up one on another by Slow Shutter function.
This function is only available when Shutter speed is set to 1/60 (1/50).

Motion Setup

```

MOTION SETUP
-----
->MOTION LOCK      OFF
PWR UP ACTION      ON
AUTO FLIP          ON
JOG MAX SPEED      120/SEC
JOG DIRECTION      INVERSE
FRZ IN PRESET      OFF
<PARKING ACTION SETUP>
<ALARM INPUT SETUP>
BACK
EXIT

```

Setup the general functions of Pan/Tilt motions.

- **Motion Lock** [ON/OFF]
If Motion Lock is set to ON, it is impossible to set up and delete Preset, Swing, Pattern and Group. It is possible only to run those functions. To set up and delete those functions, enter into OSD menu.
- **Power Up Action** [ON/OFF]
Refer to "Other Functions" section.
- **Auto Flip** [ON/OFF]
Refer to "Other Functions" section.
- **Jog Max Speed** [1°/sec ~360°/sec]
Sets maximum jog speed. Jog speed is inversely proportional to zoom magnification. As zoom magnification goes up, pan/tilt speed goes down.
- **Jog Direction** [INVERSE/NORMAL]
If you set this to 'Inverse', the view in the screen is moving same direction with jog tilting. If 'Normal' is selected, the view in the screen is moving reversely.
- **Freeze in Preset** [ON/OFF]
At start point of preset movement, camera starts freezing the image of start point. Camera keeps displaying the image of start point during preset movement and does not display the images which camera gets during preset movement. As soon as camera stops at preset end point, camera starts displaying live images which it gets at preset end point.

This function availability should be different by models.

❑ Parking Action Setup

PARKING ACTION SETUP		

→ PARK	ENABLE	OFF
WAIT	TIME	00: 10: 00
PARK	ACTION	HOME
BACK		
EXIT		

If Park Enable is set to ON, camera runs assigned function automatically if there is no PTZ command during assigned "Wait Time".

● Park Enable [ON/OFF]

● Wait Time [1~59 sec/1~180 minute]

A camera automatically run a "Part Action" if there is no command from controller for this time period.

● Park Action [HOME/PRESET/PATTERN/SWING/GROUP/prev ACTION]

Sets what a camera should do when there is no command from a controller for the pre-defined time period ("WAIT TIME"). If Park Action is set to "HOME" , the camera moves to the home position which is memorized when the system boots. If Park Action is set to "PREV. ACTION" , the camera runs the previous action which it ran most recently.

❑ Alarm Input Setup

ALARM INPUT SETUP	

→ALARM NO.	1
TYPE	N. OPEN
ACTION	NOT USED
HOLD TIME	ENDLESS
POST ACTION	HOME
BACK	
EXIT	

Sets alarm function.

- Alarm No [1~4]
Selects a sensor number to set up.
- Type [Normal OPEN/Normal CLOSE]
Sets sensor operation type.
- Action [NOT USED/PRESET/PATTERN/SWING/GROUP]
Sets actions to run when sensor is input.
- Hold Time [ENDLESS/1~59 sec/1~180 minute]
Sets the time period for the action which is run by external sensor activation. After the time period passes, the action pre-defined in "Post Action" runs sequentially in succession to the action by external sensor activation. If this option is set to "ENDLESS", "Post Action" does not activate.
- Post Action [HOME/PRESET/PATTERN/SWING/GROUP/PREV ACTION]
Sets the action that a camera should run after the time period in "HOLD TIME" passes

PRESET Setup

```

PRESET SETUP
-----
->PRESET NO.      1

CLR PRESET       CANCEL
<EDIT SCENE>
<EDIT LABEL>    LABEL123
CAM ADJUST      GLOBAL

BACK
EXIT
  
```

- **Preset Number** [1~128]
If a selected preset is already defined, camera moves to pre-defined position and preset characteristics such as Label and Relay Outputs show on monitor. If a selected preset is not defined, "UNDEFINED" shows on monitor.
- **Clear Preset** [CANCEL/OK]
Delete current Preset data
- **Edit Preset Scene** Redefine current Preset scene position (i.e. PTZ).
- **Edit Preset Label** Edits Label to show on monitor when preset runs. MAX. 10 alphabets are allowed.
- **CAM Adjust** [GLOBAL/LOCAL]
WB(White Balance) and AE(Auto Exposure) can be set up independently for each preset. There are 2 modes, "Global" mode & "Local" mode. The Global mode means that WB or AE can be set up totally and simultaneously for all presets in "ZOOM CAMERA SETUP" menu.

The Local mode means that WB or AE can be set up independently or separately for each preset in each preset setup menu. Each Local WB/AE value should activate correspondingly when camera arrives at each preset location. During jog operation, Global WB/AE value should be applied.

All Local WB/AE value should not change although Global WB/AE value changes. If "Local" is selected, Menu to set WB/AE shows on monitor.

❑ Edit Preset Scene

- ① Using Joystick, move camera to desired position.
- ② By pressing **NEAR** key, save current PTZ data.
- ③ Press **FAR** key to cancel.

❑ Edit Preset Label

- ① Edits label to show on monitor when camera arrives at presets. In Edit Label menu, a reverse rectangular is cursor. As soon as finishing selecting alphabet, cursor moves to the next digit.

- ② Using **Left/Right/Up/Down** of joystick, move to an appropriate character from the Character set. To choose that character, press the **NEAR** key.

If you want to use blank, choose Space character (" "). If you want to delete a character before, use back space character ("←").

- ③ If you complete the Label editing, move cursor to "OK" and press **NEAR** key to save completed label. To abort current change, move cursor to "Cancel" and press **NEAR** key.

Swing Setup

SWING SETUP	

→ SWING NO.	1
1ST POS.	NOT USED
2ND POS.	NOT USED
SWING SPEED	30/SEC
CLEAR SWING	CANCEL
RUN SWING	
BACK	
EXIT	

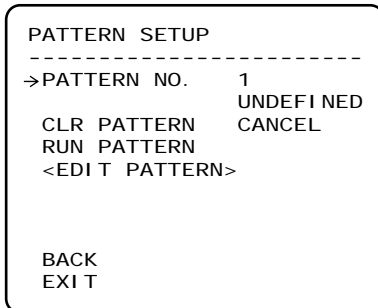

- **Swing Number** [1~8]
Selects Swing number to edit. If a selected Swing has not defined, "NOT USED" is displayed in 1st Position and 2nd Position
- **1st Position** [PRESET 1~128]
2nd Position Set up the 2 position for Swing function. If a selected preset is not defined, "UNDEFINED" will be displayed as shown below.

When swing function runs, camera moves from the preset assigned as the 1st point to the preset assigned as the 2nd point in CW(Clockwise) direction. Then camera moves from the preset assigned as the 2nd point to the preset assigned as the 1st point in CCW(Counterclockwise) direction. In case that the preset assigned as the 1st point is same as the preset assigned as the 2nd point, camera turns on its axis by 360° in CW direction and then it turns on its axis by 360° in CCW direction.

- **Swing Speed** [1°/sec ~180°/sec]
Sets Swing speed from 1°/sec to 180°/sec.
- **Clear Swing** [CANCEL/OK]
Deletes current Swing data.
- **Run Swing**
Runs Swing for the test purposes to check if it works properly.

Pattern Setup

- **Pattern Number** [1~4]
Selects Pattern number to edit.
If a selected pattern number is not defined, "UNDEFINED" will be displayed under selected pattern number.
- **Clear Pattern** [CANCEL/OK]
Deletes data in current pattern
- **Run Pattern**
Runs Pattern for the test purposes to check if it works properly.
- **Edit Pattern**
Starts editing pattern.

❑ Edit Pattern

- ① By using Joystick, move to start position with appropriate zoom. To start pattern recording, press **NEAR** key. To exit this menu, press **FAR** key.

- ② Move camera with joystick of controller or run preset function to memorize the path (mostly curve path) in a selected pattern. The total memory size and the rest memory size is displayed in the form of bar. Maximum 1200 communication commands can be stored in a pattern.
- ③ To save data and exit, press **NEAR** key. To cancel recording and delete record data, press **FAR** key.

Group Setup

```

GROUP SETUP
-----
->GROUP NO.      1
                UNDEFINED
CLEAR GROUP      CANCEL
RUN GROUP
<EDIT GROUP>

BACK
EXIT
  
```

- **Group Number** [1~8]
Selects Group number to edit.
If a selected Group number is not defined, "UNDEFINED" will be displayed under selected Group number.
- **Clear Group** [CANCEL/OK]
Deletes data in current Group
- **Run Group**
Runs Group for the test purposes.
- **Edit Group**
Starts editing Group.

□ Edit Group

```

EDIT GROUP 1
-----
->NO ACTION ### DWELL OPT
-----

SAVE      [NEAR: EDIT ACT]
CANCEL    [FAR : EDIT END]

```

- ⑤ After finishing setting up a Action, press **Near** key to one-upper-level menu(Step ②). Move cursor **Up/Down** to select Action number and repeat Step ② ~ Step ④ to edit selected Group.

```

EDIT GROUP 1
-----
NO ACTION ### DWELL OPT
-----
1 PRESET  1 00: 03 360
2 NONE
3 NONE
4 NONE
5 NONE
-----
→SAVE
CANCEL

```

- ⑥ After finishing setting up all Actions, press **FAR** key to exit. Then cursor should be moved to "SAVE". Press **Near** key to save data.

System Initialize

```

SYSTEM INITIALIZE
-----
-> CLEAR ALL DATA      NO
  ● CLR DISPLAY SET    NO
  ● CLR CAMERA SET     NO
  ● CLR MOTION SET     NO
  ● CLR EDIT DATA     NO
  REBOOT CAMERA        NO
  REBOOT SYSTEM        NO

BACK
EXIT
  
```

- **Clear All Data** Deletes all configuration data such as display, camera, motion setup and so on.
- **Clear Display Set** Initializes Display Configuration
- **Clear Camera Set** Initializes Camera Configuration
- **Clear Motion Set** Initializes Motion Configuration
- **Clear Edit Data** Deletes Preset Data, Swing Data, Pattern Data and Group Data
- **Reboot Camera** Reboots Zoom Camera module
- **Reboot System** Reboots Speed Dome Camera

Initial Configuration Table

● Display Configuration		● Camera Configuration
