

Introduction

IP04 is a PoE (Power over Ethernet) repeater that can extend TCP/IP signal and power for an additional 120M with max range up to 300 meters by chaining multiple IP04..

Features

- Sends PoE signal over a cost-effective CAT5e cable.
- Signal extension up to 120M over CAT5e (or greater) cable.
- Bandwidth up to 1000Mbps.
- Provides power up to 15W.

Installation view

IP04 itself provide data and power 120 meters , the power will drop as below by multiple POE repeaters and long cable length application:

Max Device Power Range with PoE switch	1 st IP04 Max.	2 nd IP04 Max.
	8.58W at 240M	4.21W at 360M
